

the choice of market leaders

MADERA®**at Texprocess**

A very important exhibition for all clothing machine manufacturers. In addition to other technologies besides the sewing and cutting of fabrics, the embroidery industry field will also be featured.

In contrast to other traditional embroidery trade fairs for finished garments, the texprocess will focus comprehensively on special devices in combination with standard embroidery machines for creative possibilities.

- MADEIRA will expose an extensive range of embroidery design possibilities with diverse techniques using their base line and specialty threads.

- Decorative and unique seams can be realized with the extensive line of embroidery threads offered by MADEIRA. The large section of optical and color choices offers endless opportunities.

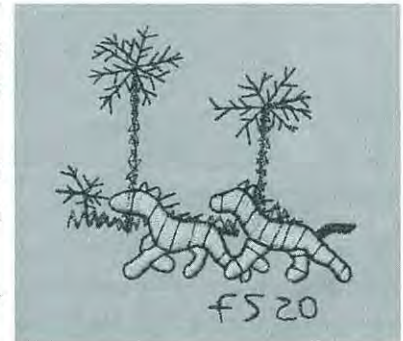

- Whether viscose, polyester, metallic or wool-like optic, MADEIRA has an impressive and diverse product line. No matter! Glossy, matt, wool or metal optics, the industry has the pick of the finest threads offered.

In addition sewing, quilting, weaving and knitting companies can benefit and enrich their possibilities by using MADEIRA.

- The use of metallic threads is increasing and will

continue in the next seasons to come. To support this trend, MADEIRA offers a uniquely large and colourful selection of metallic thread types.

- MADEIRA also offers bobbins, backings, toppings to meet the challenges for today's embroidery industry.

MADEIRA is being well received and is attracting much attention on international fabric and accessory trade fairs for their presentation of original embroidered design and seam books. Come and be inspired!

So plan plenty of time for your visit to Stand B52 in Hall 6.0! The MADEIRA Team is looking forward to seeing you and to answering your individual inquiries.
